Improved lead times and increased stock levels

We have successfully reduced lead times for our Ensign domestic sewage treatment plants to **5 working days** and large Ultra:Polylok commercial sewage treatment plants to **3-4 weeks** from order placement. We have also increased stock to **300+ Ensigns** between Bridgwater and Kettering manufacturing sites.

Professor Tom Stephenson joins Marsh

We are delighted to announce the appointment of Professor Tom Stephenson (FREng, CEng, FICHEM, FHEA) of Cranfield University to the board as a Non-Executive Director.

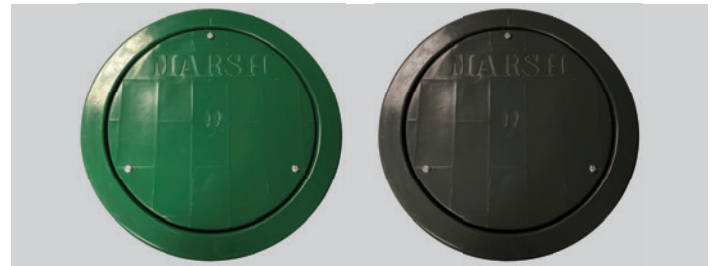

Tom actively supports innovation in the water sector and, as a member of Water UK's Net Zero Expert Panel, is working towards the industry achieving net zero carbon emissions. His research focuses on wastewater treatment processes, and he brings a wealth of experience that will further develop Marsh Industries' innovative product range.

New Civils division created

Based in offices at Waterside House, Irthlingborough, the new Marsh Civils team is dedicated to project collaboration and support for the Marsh range of Ultra:Polylok sewage treatment plants, oil separators, pump stations and associated products for the UK civils, commercial, agricultural and leisure sectors.

BSI accredited manhole covers

Marsh has received BSI test reports for in-house produced 600mm circular manhole covers. Pedestrian duty green manhole covers have been tested and approved up to 6000lbs (2.75 tonne) and medium duty black manhole covers have been tested and approved up to 9400lbs (4.2 tonne).

Oil separators delivered to Pannetoni Park, Northampton

Marsh Industries has delivered seven Hydroil oil separators to Pannetoni Park, Northampton.

Located near the environmentally sensitive Nene Valley, the site boasts over 11.6m sq ft of warehouse space and offers prime access to the UK motorway network.

In total, three bypass separators and four full retention separators were supplied across three phases of site development.
